

BREAK-OUT GROUPS

So, let's say what needs to be done

Objective:

- 1.To develop a consensus on the critical elements to be included in a science plan on understanding and adapting to extremes.
- 2.To develop a strategy for implementing a project to address these science and policy issues.

APPROACH

What are the elements we need to include?

QUESTIONS

1. What is our vision in regards to adaptation to extremes ?
2. What is the status of our current knowledge and capabilities?
3. How do we move forward?
 - motivation
 - science issues
 - focal points?
 - data, model ...
 - partners
 - communication
 - timing?
 - ...

THOUGHTS

Need to bring together the various perspectives

Need to consider a national perspective
a collection of interacting regional focal points?

May need to consider a spectrum of funding

GROUPS

Two groups
